PROFESSIONAL SUMMARY

Junior Full Stack Developer trained in Python and React, with hands-on project experience building web applications using React/Next.js, Django REST Framework, and PostgreSQL. Familiar with REST API integration, authentication, state management, CRUD workflows, debugging, and Git-based collaboration. Seeking an entry-level developer role and continuing to build skills in AI-powered full-stack development.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Material UI
Backend: Python, Django, Django REST Framework (DRF), REST APIs
Database: PostgreSQL
State & API: Redux Toolkit, Axios, JWT authentication, protected routes
Tools: Git, GitHub, GitLab, Postman, VS Code
Concepts: Full-stack development, CRUD, authentication and authorization, API integration, responsive UI, debugging

INTERNSHIP

AI-Powered Python + React Full Stack Developer Intern | Upcode Software Labs |Jan2026 – present

- Completed hands-on full-stack development training and internship work focused on Python, React.js, Django, REST APIs, databases, and web application development.
- Contributed to team-based full-stack projects across frontend and backend development.
- Gained practical experience with API integration, database operations, authentication, CRUD functionality, and responsive web interfaces.
- Used Git and GitHub for source control and collaborative development.

PROJECTS

CRM Management System | Team Project (4 Members)
Technologies: Django REST Framework, Next.js, TypeScript, PostgreSQL, Material UI, Redux Toolkit, Axios

- Contributed to a CRM application for managing companies, leads, deals, tickets, and customer activities.
- Developed ticket-management functionality with CRUD operations, multi-owner assignment, search, filtering, and pagination.
- Contributed to Django REST Framework backend work, including REST APIs, database models, and authentication.
- Used PostgreSQL and Django ORM for relational data management and integrated APIs with the React-based frontend.
- Applied JWT authentication and role-based access control concepts for protected API resources, and collaborated through Git/GitHub.

E-Commerce Web Application
Technologies: React.js, Redux Toolkit, Django, Django REST Framework, PostgreSQL, Axios, JWT

- Developed a full-stack e-commerce application with a React frontend and Django REST Framework backend.
- Implemented registration, login/logout, JWT authentication, protected routes, product browsing, categories, product details, cart, checkout, and order history.
- Used Redux Toolkit to manage authentication, product, cart, and order state.
- Integrated REST APIs using Axios with JWT access-token authentication.
- Implemented product reviews with backend eligibility validation based on purchase and delivered-order status.
- Used PostgreSQL and Django ORM to manage user, product, cart, order, and review data.

EDUCATION

Diploma in Computer Engineering | Government Polytechnic College, Tirurangadi | 2011
